Project & Work

Product Designer & Product Manager - Train On, Arizona, USA

June 2024 March 2026 | Remote

Product Designer
Designed an integrated fitness management SaaS platform spanning desktop software, membership apps, nutrition tracking, and self-service kiosks.
Designed end-to-end workflows for CRM, scheduling, billing, payroll, check-ins, and point-of-sale systems.Translated business requirements and user needs into user flows, wireframes, high-fidelity interfaces, and developer-ready specifications.
Established consistent design patterns across interconnected products, supporting businesses ranging from enterprise gym chains to independent trainers.
Product Manager
Bridged design and engineering, translating product requirements into actionable tasks and implementation-ready specifications.
Coordinated sprint planning, task prioritization, scope, and cross-functional delivery.
Collaborated directly with leadership and engineering to clarify requirements, resolve edge cases, and align product decisions with business goals.
Conducted quality assurance and reviewed implementations to ensure the final product matched the intended experience.

Freelance Website Designer - Unified Care Autism Foundation

Designed the foundation's website to communicate its mission, services, and autism support programs clearly. Structured website content and navigation to make therapy services, resources, and contact information accessible and easy to find. Worked closely with the team to understand organizational goals and the information families need when exploring care services.

Freelance Website Designer - SealProof, Canberra, Australia

Designed and built a responsive website in Framer for a tile regrouting and resealing business. Organized the website around customer trust, using project results, reviews, and guarantees to support enquiries. Configured the CMS to make ongoing project updates easier without developer assistance.

Product Designer - 34°N Studio, India

Worked across multiple client projects, including Kuddl Kin, Bhajan Global Impact Foundation.
Kuddl Kin: Worked on the website and mobile app, supporting the discovery and presentation of products across digital platforms.
Bhajan Global Impact Foundation: Contributed to the foundation's digital presence, helping communicate its mission and initiatives.
Adapted design approaches to different brand identities, audiences, and project requirements across web and mobile experience.

Fit.Nest Wellness App

Concept: Fit.Nest is a dynamic wellness mobile app facilitating the discovery and booking of outdoor fitness activities, fostering a community of like-minded users.
Conducted extensive user research to understand needs and preferences. Designed iOS and Android applications along with a responsive website.

Tattoo

Completed a tattoo artistry course, creating nearly 50 designs
